

## PLENARY 5

### **NCDs and Climate Change: Shared Opportunities for Action**

Marium Husain

NCDs and climate change are linked. As climate change continues to impact our local and global communities, we see more direct and indirect impacts on NCDs: food security and nutrition, respiratory diseases and air pollution, infectious diseases, access to healthcare services, and much more. Please join us for an informative discussion on a topic that affects all humanity.

Keywords: NCDs, Climate change, Food security, Respiratory diseases, Air pollution, Healthcare access.
