

EDITORIAL MESSAGE

Assalamualaikum WBT and greetings,

We are deeply grateful to Allah SWT for granting us the strength and dedication to successfully conclude the KHUAM 6th National Conference of Academic Medical Centre held on the 17th and 18th of October 2024. The conference was mainly organised by Hospital Universiti Sultan Abdul Aziz Shah, Universiti Putra Malaysia together with the Ministry of Higher Education and Konsortium Hospital Universiti Awam Malaysia. This year's event gathered professionals and academics in the medical and healthcare-related field, offering an invaluable platform for the exchange of groundbreaking ideas, clinical insights, and research developments.

The conference hosted a dynamic series of sessions aimed at enhancing clinical skills, expanding knowledge, and fostering collaborations across various medical, clinical and healthcare-related administrative specialties. It was heartening to witness the active engagement of attendees, which included esteemed clinicians, healthcare practitioners, researchers, and students from all over Malaysia. Together, they participated in a range of presentations, and discussions designed to spark intellectual discourse and inspire future innovations in healthcare.

This year's conference included awards for a Young Investigator Award and Best Oral Presentations, recognising excellence in both the depth of research and the clarity of communication. By encouraging participants to share their expertise and research, this conference aimed to empower the next generation of medical and healthcare professionals with the confidence and skills to advance the field.

We extend our heartfelt appreciation to our sponsors, collaborators, distinguished speakers, judges, and all participants for their support in making KHUAM 6th National Conference of Academic Medical Centre 2024 a memorable and successful event. May the abstracts and findings presented within this supplementary issue serve as a valuable resource for readers and contribute to the continuous advancement of medical knowledge.
